Student Report

Name of Student	Kayra Ecrin Küçük		
Course	Engineering: Civil, Mechanical & Electrical		
Name of Teacher	Mamoona Najeeb		
Dates	**From:** 02/08/2026	**To:**	15/08/2026

Your Course Outcomes

On the Engineering: Civil, Mechanical & Electrical course, students explored how core engineering principles are applied to real-world challenges and innovations shaping the modern world. They reinforced their understanding of the mathematical and scientific foundations of civil, mechanical, and electrical engineering through case studies and practical examples. The course introduced students to the engineering design process and fostered essential skills including project management, communication, and leadership. Working collaboratively, students applied theoretical knowledge to propose solutions to global issues through a group project. The course provided a strong foundation in engineering thinking and professional skills essential for future study or careers.

Skills Developed

During this course Kayra Ecrin Küçük has developed their academic, interpersonal, and professional skills, including:

- **Critical thinking and analysis** through engaging in insightful debates, discussions, and with real-world case studies and examples.
- **Teamwork and leadership** through collaborating with international peers in projects and challenges.
- **Communication and presentation** through networking with international peers, contributing to class discussions, and presenting their work for assessment.
- **Research, problem-solving, and innovation** through completing assessments and participating in group tasks and projects.

By engaging with the course content and activities, Kayra Ecrin Küçük has also developed their subject-specific practical and professional skills essential for future success in their chosen pathway.

Student Feedback

Kayra has been an exceptional student throughout these two weeks, consistently demonstrating enthusiasm, commitment and a genuine interest in every aspect of the course. Whether completing an individual assessment or contributing to a group activity, she always participates fully and approaches each task with great dedication. Kayra regularly asks thoughtful and critical questions, demonstrating that she engages deeply with the topics covered and has a strong understanding of the engineering concepts being discussed. Her curiosity and willingness to explore ideas further have been real strengths throughout the course. She also has excellent writing skills, as clearly demonstrated in her work on future engineering technologies. She explored technologies from different engineering disciplines in great depth, presenting detailed information and demonstrating a strong understanding of their applications and potential. Kayra also possesses very good presentation skills. This was particularly evident in the confident delivery of her section of the group presentation, during which she communicated her ideas clearly and effectively. Overall, Kayra has been a committed, enthusiastic and thoughtful student who has made an excellent contribution throughout the course. She has been a real pleasure to teach and I am confident that her positive attitude, curiosity and dedication will support her continued success. Good luck with your future studies and all your future endeavours, Kayra! I wish you every success and happiness for the future.

Criterion	Score	Overall Score
Attendance and punctuality	10 / 10	84 / 100
Written assignment	23 / 25	**Overall Grade**
Project assignment	23 / 35	A
In-class contribution and effort	19 / 20	
Progress	9 / 10
